During the Monthly scheduled conference call this topic was not fully discussed as requested by NM during the March conference call. Only three from EPA participated in the call, essentially leaving all agenda items on the list for next month. NM would like a status update on our progress related these issues. I thought that we should get together and talk about what each group is doing.

1. NM provisions to incorporate temporary site-specific standards that can be implemented
2. NM proposal language and HQ review
3. NM Economic evaluation for implementation
